

Zori Greene

zogre2@morgan.edu - 443-934-5617 - Baltimore, MD

EDUCATION

Morgan State University (MSU)

Bachelor of Science in Computer Science;
3.95 GPA.

Baltimore, MD

Expected Graduation: May 2028

SKILLS

Technical: Python, JavaScript, HTML, React, BeautifulSoup, NumPy, SQLite, RegEx, CSS, Git, C, C#, Unity, Figma, Visual Studio Code, Blender.

SPECIAL PROJECTS

Kirby x Mario Galaxy Redesigned in Unity 3D , Baltimore, MD

September 2025

- Created custom animations utilizing **Unity's** built-in animator.
- Developed a Faux gravity system in **C#** for a spherical open-world traversal experience.
- Altered 3D models in **Blender**.

3D Printed Tricopter, Baltimore, MD

May 2025 – Present

- Modifying an open-sourced **Arduino-based** flight stabilization system to fit a custom multirotor setup in **C**.
- Designing circuits for radio communication.
- Soldering electronic components to boards for custom wiring setups.
- **Designing & 3D printing** the body of a Tricopter in **Blender**.

Discord Bot, Baltimore, MD

August 2022 – Present

- Developing a **Web Scraping Discord Bot** for sending recent updates on manga releases.
- Analyzing data collected from websites in a database using **BeautifulSoup**, **RegEx**, and **SQLite**.
- Managing user information and storing it in a database for games in Discord servers.

WORK EXPERIENCE

Morgan State University Human AI eXperience Lab (HAX Lab)

Baltimore, MD

Researcher

January 2025 – Present

- Develop web applications that support and impact Baltimore City students.
- Utilize **Machine Learning** and **Artificial Intelligence** APIs.
- Conducting research using artificial intelligence software.
- Equipment supervisor for the Inaugural **HBCU Brain Drone Race**.
- Created STEM lesson plans for Baltimore City youth.

Code Ninjas

Atlanta, GA

Teacher

July 2021 – August 2022

- Delivered hands-on lessons to grade school students through interactive games developed in **Java**.
- Guided students K-12 through beginner circuit projects to build an understanding of problem-solving in robotics.
- Tested students' games developed in **Java** to gauge their understanding of the concepts and provide constructive feedback.

NotYetPro

Atlanta, GA

Software Tester

August 2023 – September 2023

- Gave feedback on the appearance and functionality of a web application through weekly testing and documentation.

CAMPUS INVOLVEMENT

The Society for the Advancement of Computer Science (SACS), *Member*

August 2025 – Present

The National Society of Leadership and Success (NSLS), *Member*

November 2025 – Present

MSU Skateboard Club, *Founder/President*

May 2026 – Present
